SUMMARY

Fullstack Developer with 2+ years of experience developing and maintaining business web applications and ERP systems using Laravel, JavaScript, TypeScript, and MySQL. Experienced in RESTful APIs, system maintenance, debugging, operational workflows, and frontend-backend integration for real-world business applications.

SKILLS

Technical skills

- **Frontend:** JavaScript, TypeScript, HTML5, CSS3, SCSS, Angular.
- **Backend:** PHP, Laravel, RESTful APIs.
- **Database:** MySQL, Database Design, Query Optimization.
- **Integration & Workflow:** API Integration, Webhooks, Operational Workflows.
- **System & Deployment:** Linux, Apache, LAMP Stack.
- **Tools & Workflow:** Git, Swagger, Agile/Scrum.

Soft skills

- Problem-solving and analytical thinking.
- Product and user-focused mindset.
- Cross-functional collaboration.
- Technical communication.
- Independent learning and adaptability.

EXPERIENCE

Software Engineer | Tedfast Company Limited

Sep 2023 - Present

- Developed and maintained ERP systems and business web applications using Laravel, JavaScript, TypeScript, and MySQL.
- Built responsive management interfaces and reusable frontend components using HTML5, CSS3, SCSS, and Angular.
- Developed RESTful APIs and integrated operational workflows across 21 branches.
- Supported debugging, bug fixing, deployment, and production operations on Linux environments.
- Designed and optimized MySQL queries to improve system performance, maintainability, and data consistency.
- Developed Laravel Blade templates and automated email workflows for customer registration, quotation, and order notifications.
- Worked closely with Developers, QA Engineers, and Business teams in Agile/Scrum environments.

PROJECTS

ENTERPRISE EDUCATION MANAGEMENT ERP SYSTEM

Jan 2024 - Present

Fullstack Developer | Team size: 6–9 | edfast.vn (overview)

Enterprise ERP platform supporting scheduling, attendance tracking, reporting, and operational workflows across 21 branches.

- Developed frontend and backend features using Laravel, JavaScript, TypeScript, and MySQL.
- Built responsive management interfaces and reusable UI components for internal operational systems.
- Developed RESTful APIs and integrated operational workflows between ERP modules.
- Supported debugging, system maintenance, deployment, and production issue handling.
- Optimized MySQL queries and improved system performance for large operational datasets.
- Developed Blade-based email templates and notification workflows.

Tech Stack: PHP, Laravel, Angular, JavaScript, TypeScript, MySQL, RESTful API, HTML5, CSS3, SCSS, Linux.

AI-POWERED MULTILINGUAL CMS PLATFORM

Fullstack Developer | livetocode.io.vn

Multilingual CMS platform supporting automated Vietnamese-English content workflows.

- Built responsive administrative interfaces using Angular and JavaScript.
- Developed backend services and RESTful APIs using Laravel and MySQL.
- Integrated AI translation services using FastAPI and Hugging Face M2M100.
- Supported debugging, database optimization, and Linux deployment workflows.

Tech Stack: PHP, Laravel, Angular, JavaScript, MySQL, FastAPI, RESTful API, Linux.

EDUCATION

University of Information Technology – Vietnam National University, Ho Chi Minh City

Bachelor of Information Technology | **GPA: 7.66/10** | **Expected Graduation: Sep 2026**
